

Groupe Maillard Industrie

Expert in welded structures and metal assemblies

From design to production, GMI is your industrial partner for mechanical welding:

- 45 years' expertise in welded structures and metal assemblies
- 1 in-house engineering department: 45 technicians and engineers
- 50,000 m² of workshop space and 120 tonnes of steel processed per day

AGRICULTURAL MACHINERY

Design and manufacture of metal components for agricultural vehicles.

PROJECTS

frames for circular saws, mini-excavator frames, containers for drying timber, metal brackets for tractor bumpers...

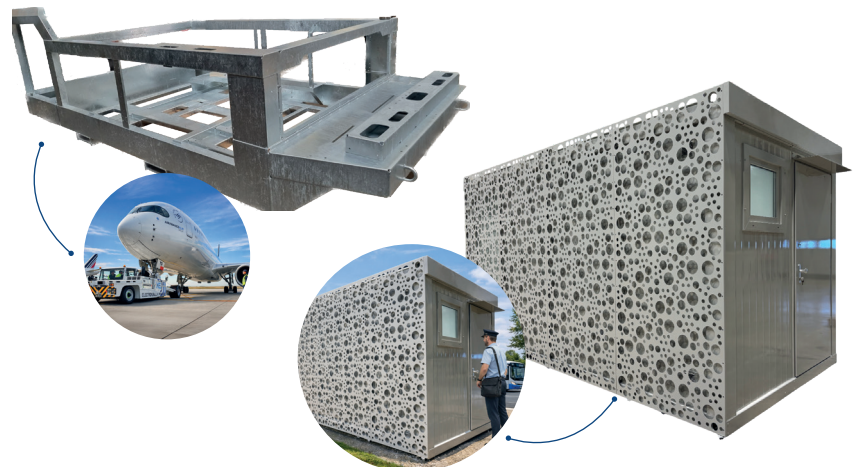

MOBILITY AND SPECIAL VEHICLES

Design and manufacture of assemblies and sub-assemblies for all types of specialised vehicles.

PROJECTS

mechanically welded chassis for airport specialised vehicles, chassis and tanks for TGV bar carriages, toilet modules for public transport drivers...

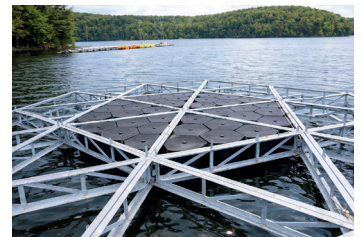

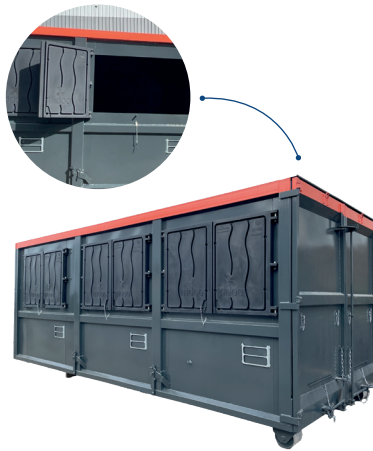

ENVIRONMENT AND WASTE MANAGEMENT

Support for companies specialising in waste management and renewable energy

PROJECTS

waste management bins, waste transport containers, metal supports for floating solar panels, stainless steel structures for storage tanks...

SUPPLY CHAIN AND ERGONOMICS

Design and manufacture of bespoke solutions for supply chain operators.

PROJECTS

ergonomic height-adjustable table, electric e-commerce trolleys, cheese storage racks, electric-assisted mobile base...

DEFENCE

Design and manufacture of assemblies and sub-assemblies for protective devices and military equipment.

PROJECTS

anti-intrusion barriers, frames for protective barriers, fuel tanks...

Over 45 years' experience in metal fabrication and welding

70

MIG, MAG, TIG and laser welding stations

6

welding robots

120

tonnes of steel processed per day

220,000

hours of welding per year

80,000

welded steel structures and metal assemblies per year

400,000

mesh panels per year
